

# Hotel Management Companies

## Automating Procure-to-Pay processes provides benefits to Hotel Management Companies.

BirchStreet provides direct and significant measurable benefits to hotel management companies by automating the P2P business process. Embedding business processes into BirchStreet's technology solution drives compliance to the management company's operating procedures, and improves their profitable growth.

## CORE BENEFITS TO MANAGEMENT COMPANIES

### Competitive advantages of using the most widely used cloud P2P system in the global hospitality industry:

- ✓ **Retain customers** by integrating purchasing, payment and inventory data into your ERP or accounting system.
- ✓ **Retain customers** by embedding your business practices into your technology system.
- ✓ **Acquire new customers** by offering better P2P services that competing management companies don't offer.
- ✓ **Acquire new customers** by differentiating your business with cutting-edge technology built for hotel management.
- ✓ **Reduce operating expenses** by reducing the resources required to process AP in your office. P2P automation scales for growth.
- ✓ **On-board new customers and locations faster** using BirchStreet's technology to drive process compliance.
- ✓ **Increase profit based incentives** by reducing and controlling property expenses.
- ✓ **Improve management tools** by providing instant property, regional and enterprise visibility to P2P transactional data and business intelligence.
- ✓ **Improve work-flow compliance** by incorporating business processes into operating technology.

## ABOUT BIRCHSTREET

BirchStreet software is a cloud-based Software-as-a-Service **procure-to-pay platform**, which focuses on business process improvement (BPI) using eProcurement, AP Automation, Inventory Control, Recipe Management and Capital Budget Management.
