## ABOUT BIRCHSTREET

BirchStreet software uses a cloud-based Software-as-a-Service **procure-to-pay platform**, which focuses on improving business processes using eProcurement, AP Automation, Inventory Control, Spend Analytics, Recipe Management and Capital Budget Management.

BirchStreet understands a casino's compliance and regulatory requirements and the need for real time access to data for critical decision making. The platform's secure structure allows BirchStreet to operate independently of casino player data and payment systems. Casinos are able to streamline their supply chain, including sourcing and RFQs, contract management, purchasing, receiving, inventory, payment, and capital budgets, with deep business intelligence to enhance profitability. Visibility and control tools drive supplier compliance, lowering supply costs and attaining greater profitability through processing efficiencies. We have raised the stakes to make your casino a sure bet.

Creating P2P Solutions.
